Lincon Pietrochinski Fernandes

Professional Summary

Full Stack Developer with over 3 years of experience, progressing from trainee to mid-level positions in healthcare-oriented systems. Strong foundation in Angular, React, .NET (C#), and SQL Server. Focused on delivering scalable, high-performance, and maintainable solutions, applying best practices such as Clean Architecture and Design Patterns. Proactive, communicative, and results-driven professional with a collaborative mindset.

Experience

- Interprocess Gemed – Remote
- Software Development Assistant II
- April 2022 – Present

- Contributed to the development and maintenance of the company's main system, used by hospitals and clinics, with a focus on performance and scalability.
- Implemented front-end functionalities using Angular and React, following UX best practices and componentization standards.
- Developed REST APIs in C# / .NET, adhering to SOLID principles and Clean Architecture.
- Created Windows Services to automate administrative processes and integrate with external systems (TISS, Billing).
- Refactored legacy modules to improve readability, maintainability, and performance.
- Actively collaborated with analysts and QA teams in agile cycles (Scrum), contributing to estimations, testing, and technical documentation.
- Built administrative web applications with authentication, data persistence, and security validations.

Core Skills

Frontend Web: Proficient in Angular, React, and TypeScript.

Desktop Development: Experience with Windows Forms and DevExpress for desktop applications.

Backend Development: Strong knowledge of C# and .NET, with expertise in API and Windows Service development.

Databases: Skilled in SQL data modeling and query optimization (SQL Server).

Languages

English: Fluent

Portuguese: Native

Courses & Certifications

Frontend Web: Implement High-Fidelity Designs with Material-UI and ReactJS (40h)

Backend: Design Patterns with C# (12h)

Clean Architecture Essentials — ASP.NET Core with C# (14h)

Database: SQL Server / Azure SQL Database and Power BI (97h)
